## BERRY PLANTS

Last year owing to Japanese evacuation, few berry patches were set. For the next few years berries will be high and this industry should bring good returns. Why not secure the best stock from informed sources.

We have selected carefully the following varieties to offer to our trade:

### STRAWBERRIES

Each    Dozen    100

We suggest a patch of 200 for  
the average family.

## BEGONIAS

Begonias have long been our specialty. However, the only assortment we have to offer this year are the Doubles, in six different colors, Red, White, Yellow, Pink, Salmon, and Orange. Large sized blooming bulbs at **\$2.50 per dozen**. A limited supply of Hollyhock Begonias, which grow to a height of 18 to 24 inches. Single soft pink blossoms born in the leaf axils. Blooming size bulbs **35 cents each, \$3.50 per dozen**.

Begonias are of simple culture. Given a proper condition, guarded against mid-day burning sun, and provided maximum light and fresh air, they should readily respond. An ideal soil is one-third each, loam, peat or leaf mold, and well rotted manure. Pot them up or plant them in Spring as soon as the first bud swelling or shoots appear.

**PINK CALLA BULBS**—Large size ..... **.30 cents ea.**

Garden and field seeds of all kinds. Ask for prices.

Do not neglect the keeping up of your ornamental yard. We can supply landscaping and all that goes with it.

V . . . —

For the Home Garden with a small back yard we can furnish dwarf fruit trees to be planted 10 feet apart (fruit normal size) in Apples, Apricots, Pears, Peaches, Plums, our selection at **\$2.00 each**—dwarf trees bear young.

## A WORD TO OUR CUSTOMERS

We are not publishing a catalogue this season. So many of our lines are broken and unobtainable. Also often before harvest time our stocks are booked up or sold out. This will be a year of shortages. We will do our level best to supply our regular customers and new friends, but ask you to co-operate by forecasting your needs and ordering early.

Our company has stood in the front ranks of horticultural and agricultural development in the West for close to a half century. Has studied field crops, orchard work, etc., from all angles. It is now up to the farmer to produce maximum crops under most trying conditions. If by virtue of our accumulated experience and knowledge regarding climatic and soil conditions, methods of operations, or marketing we can assist, call on us and we will respond without obligation on your part.
